

Budget Tracker Monthly Financial Report

Reporting period: July 2026 | Generated on 02 July 2026 15:01 (Europe/London)

This report summarises budget performance, spending momentum, category concentration, and transaction-level risk indicators for July 2026. It is designed to support month-end review and near-term spend control decisions.

Executive KPI Snapshot

The snapshot below separates each KPI from its interpretation so values remain readable and the report explains what each number means.

KPI	Value	What it means
Monthly budget	GBP 800.00	Your planned spending limit for the current reporting month.
Current spend	GBP 495.54	Actual expense transactions recorded so far in the current month.
Cash in	GBP 4500.00	Income recorded for this month from the monthly income setting.
Net cash flow	GBP 4004.46	Income minus expenses. Positive cash flow means more came in than went out.
Remaining budget	GBP 304.46	Monthly budget minus current spend. This is the spend control amount for the rest of the month.
Budget utilisation	61.9%	Current spend as a percentage of the monthly budget.
Income coverage	908.1%	Income divided by current spend. Very high values usually mean spending is still low compared with income.
Projected month-end	GBP 15361.74	Estimated month-end spend if the current daily spending pace continues.
MoM change	GBP -195.10	Current month spend minus previous month spend. Negative means spending has reduced.
Average transaction	GBP 247.77	Average value of current-month expense transactions.
Transactions	2	Number of expense transactions included in this monthly report.
Previous net cash flow	GBP -690.64	Previous month income minus previous month expenses, used as the comparison baseline.

Key insights

- July 2026 spend closed at GBP 495.54, versus GBP 690.64 in the previous month.
- Recorded income for the period is GBP 4500.00, producing net cash flow of GBP 4004.46.
- Budget variance is GBP 304.46 under plan.

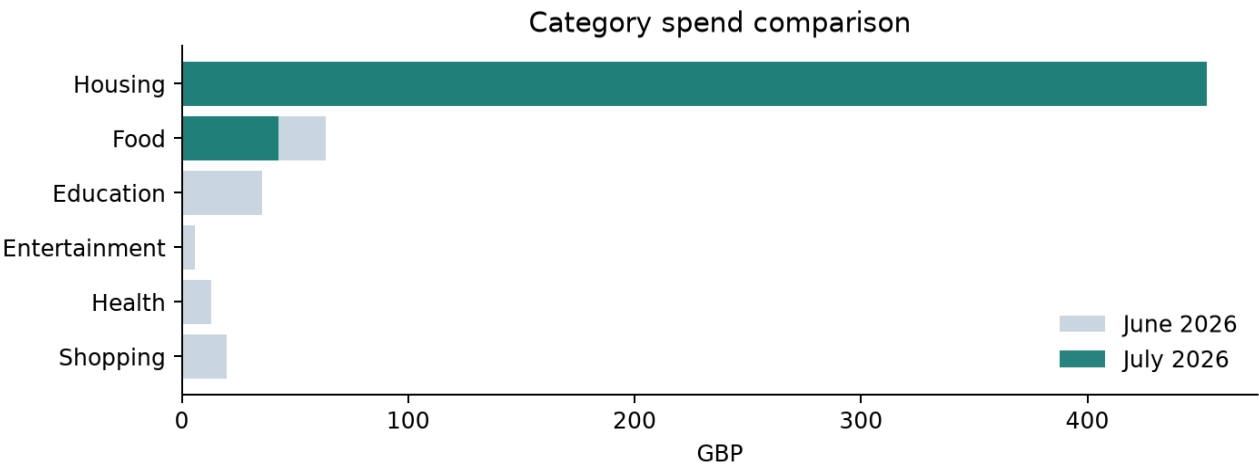

Budget Tracker

- Projected month-end run rate is GBP 15361.74 based on current daily pace.
- Average transaction value is GBP 247.77.
- Housing is the dominant category, accounting for 91.4% of current-month spending.
- The largest single transaction was Shared accommodation rent at GBP 452.74 on 2026-07-01.

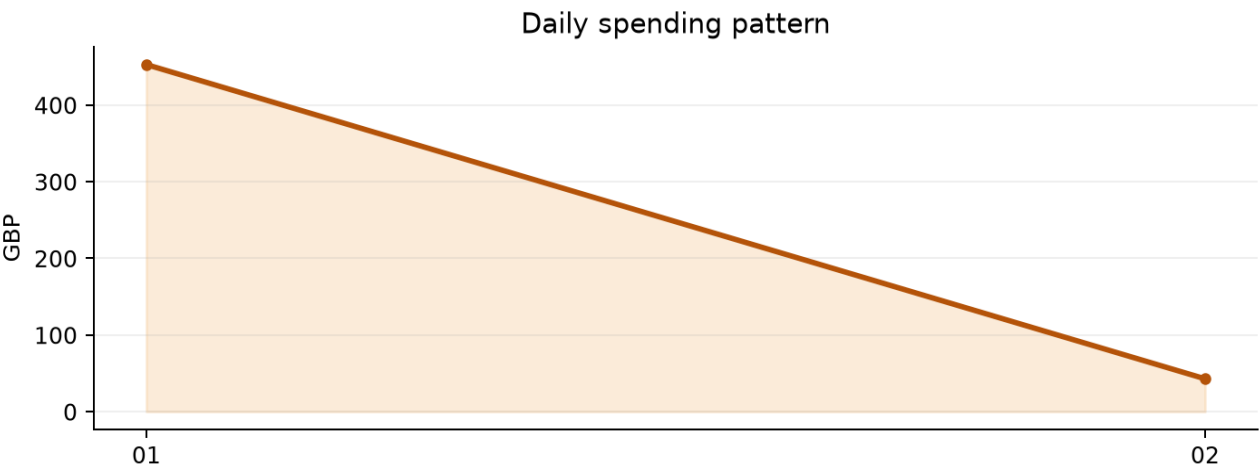

Operational recommendations

- Introduce a short-term spending hold on discretionary categories until projected month-end spend falls below budget.
- Review the Housing category in detail because concentration above 40% materially increases budget risk.
- Validate whether Shared accommodation rent should be budgeted as a recurring cost or treated as a one-off exception.
- Remaining available budget is GBP 304.46; use this as the control threshold for the rest of the cycle.
